HTML & CSS Practice

On the right is the landing page for a newsletter all about house plants.

The starter code has all the HTML for the page, but a few lines of CSS have been removed. Your job is to put the CSS from `missing-css.txt` in the correct places in `styles.css` in order to make your page look the same as pictured on the right.

You do not need to write any new css to complete this activity.

Green

House Plant Daily

A daily email blast about what's trending in the plant world.
